a the intervention
α = 0.3
α = 1
centroids separate
× centroid; solid: one within-class distance, the same in both up to one global scale
b PH-dimension
(0→1: 3.0×; 1→8: 3.5×)
estimator value
centroid scale α
c TwoNN
(0→1: 1.18×; 1→8: 1.00×)
d leakage L_2
(= 0 from α = 1.5, all seeds)
fraction of points
vertical rule: α = 1, the recorded converged representation
α axis: linear below 0.75, logarithmic above; the break marks the join
